COURSEWORK

GRADUATE

- Advanced Java | DBMS
- Object Oriented Programming
- Analysis and Design of Algorithms
- Cloud Computing
- Machine Learning

ACHIEVEMENTS

ACADEMICS

1. PG club Secretary - 2023
2. Secured 1st Rank in college - UG
3. Received Class Topper awards in 2019,2020,2021

CODING

1. 1st in Debugging in Symposium at Rohini College of Engineering
2. Secured Debugging awards in Symposium at various colleges

EXPERIENCE

ASIR TECH | SOFTWARE ENGINEER

June 2023 - Present | Nagercoil, TN

- Developed and Implemented the web application projects using **Core Java**, J2EE, Struts, JDBC, **Spring boot**, Microservices, **PL/SQL**
- Working knowledge in complex PL/SQL queries, Procedures, Functions and Views in Oracle SQL Developer.
- Use Java/J2EE, Spring boot technologies to develop web application for client server environment and add functionalities to existing applications.
- Developed the architecture for **Restful API** using Spring Boot and Maven.
- Worked in all phases of the SDLC in Agile Methodology.
- Good understanding of common API technologies, such as OAuth, Struts and SAML with **okta Idp** and Keycloak.

ASIR TECH | SOFTWARE ENGINEERING INTERN

Dec 2022 – May 2023 | Nagercoil, TN

- Collaborated with the development team to design and implement new software features.
- Developed an POC for Data processing application using **Apache Spark** and **Apache Kafka**
- Wrote clean and efficient code following software development best practices.
- Conducted testing and debugging to ensure software quality and functionality
- Tech Stack: **Core Java, Spring, JSwing, Kafka**
Database: **PostgreSQL, MySQL**

PROJECTS

FACE RECOGNITION ATTENDANCE SYSTEM | MACHINE LEARNING

Nov 2022 – Dec 2022 | Python, Tensorflow, OpenCV

The Real-time face recognition attendance system is a highly effective solution for attendance management in various educational institutions and workplaces.

The system utilizes advanced deep learning-based face recognition models such as **MTCNN** and **FaceNet** to detect and recognize faces in real-time video streams.

CRIME SCENE ANALYZER | IMAGE PROCESSING

Jan 2021 – April 2021 | Python, MatLab

•Crime Scene Analyzer is to predict the criminal involved in Crime. A Visual clue (object, place) of image retrieves the similar crime and criminal details among the knowledge base.

•Led the development of Crime Scene Analyzer, the first ever breakthrough predicting the suspect with their patterns — **Quick link**

AWARDS

2023	1 st /60	Debugging in CSE Symposium at Rohini Engineering College
2023	1 th /120	Debugging in IT SYmposium at Rajas Institute of Technology
2022	2 nd /150	Jumbled words in CSE Symposium at Rohini COLlege
